

House 51 has been designed to accommodate holidaymakers who love Queensland's great outdoors, from the most active to those seeking total relaxation, surrounded by nature

51

BEACH ROAD
HOLIDAY HOMES

This home is a delight to occupy, with thoughtful environmental design ensuring maximum breeze capture, cooling and consideration of natural light.

The overall positioning of this home integrates with the surrounding natural landforms, and outlooks from the main living areas take in natural bushland views of well established flora.

Boasting the convenience of a private beach shower and a lockable storage unit for recreational items directly off the carport, *House 51* is an ideal base for those who enjoy the outdoor activities that Noosa's North Shore has to offer.

Architect: Gall & Madek

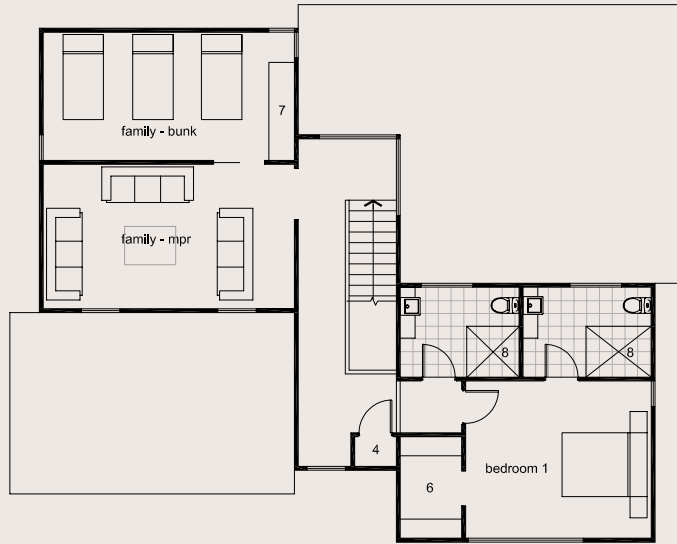

Gall & Madek designed *House 51* to facilitate the social interaction typical of a holiday lifestyle as well as encouraging interaction with the surrounding landscape.

Open flowing floor plans and large screen decks for vertical and horizontal circulation create a fresh and fluid coastal ambiance.

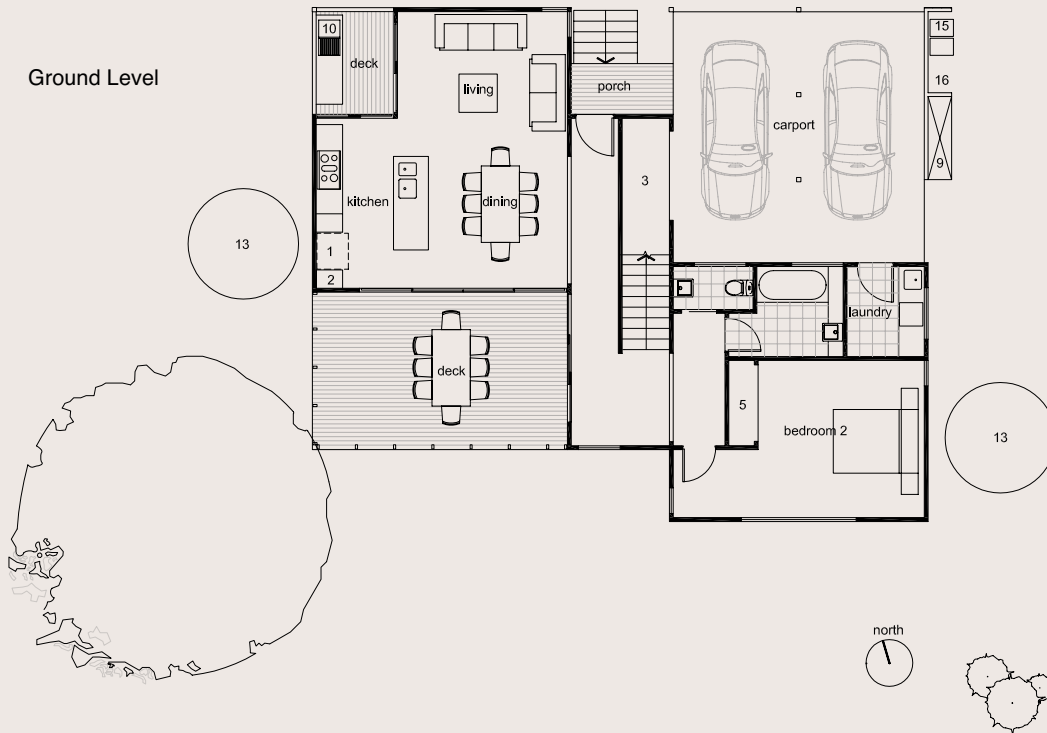

The deck has been designed to feel like the heart of this house; not just a destination, but a place from where you can watch daily life – both inside and outside the house – unfold.
